

All things Green – Skymark subscribe to Operation Clean Sweep and win PRS Green Label award

Skymark Packaging has long held a desire to conserve our environment. We produce innovative packaging solutions, efficiency projects and next level working methods. Whenever we explore a possibility to improve, we endeavour to involve our work force or (wherever possible) local companies that share the same philosophy as Skymark, reducing unnecessary carbon emissions associated with travel and logistics. Our material recycling efforts mirror our philosophy.

In order to officially state our intentions, we have therefore decided to subscribe to Operation Clean Sweep – the global scheme aimed at reducing plastic and plastic pellets reaching the environment.

We have long taken great care in our working methods to ensure that we are as clean and green as possible but we have now taken the plunge to work alongside some of the biggest players in the business to ensure we play our part in keeping our environment as clean as possible.

Our efforts now include:

ISO 14001 Environmental Certification

Operation Clean Sweep

PRS Green Label Award 2019

Together with our partners at BSI, Barbour and Pureloop, we ensure that we maintain compliance to applicable standards requirements, up-to-date legal compliance and high quality, efficient recycling solutions throughout our business.

But we don't just stop there. By continually reviewing our operations and assessing our performance against our strict KPI's, we establish a raft of innovative ways to improve our environmental performance in everyday life:

- All of our generated waste is recycled on or off-site, with over 99% being recycled or used for Refuse derived fuels
- Our on-site Pureloop recycling unit ensures that we have the ability to recycle up to 1,500t of plastic materials directly on site
- We have developed innovative strategies to further cement our position as a leader in all things environmental

At Skymark, we don't just ride the wave, we *make* waves...
