

WITH BIOMASTER
ANTIMICROBIAL TECHNOLOGY

Antimicrobial product range

In exceptional circumstances, exceptional ideas and products are required. SKYMARK has teamed up with Biomaster to create cleaner, more hygienic, protected plastic surfaces.

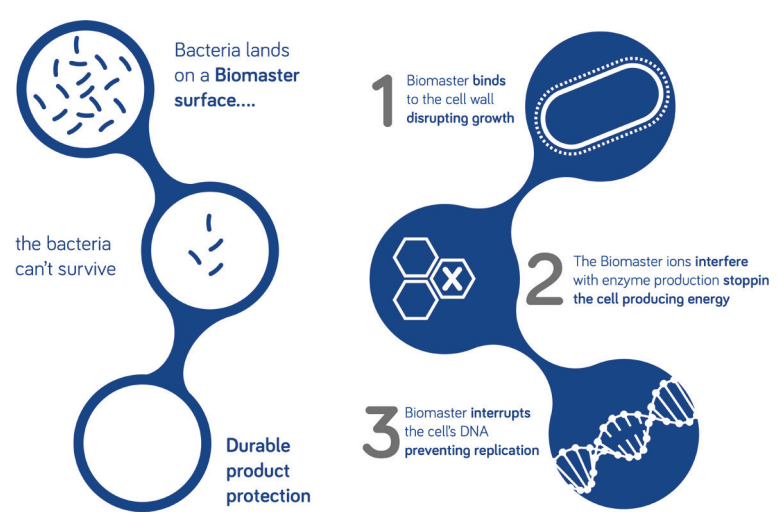

Biomaster efficacy works 24/7 for the lifetime of the product against most types of harmful bacteria

Originally developed as part of a product range for Cool Bags, Skymark's antimicrobial film offerings are being expanded to support a range of other applications.

Fully recyclable

Skymark's antimicrobial product range can be supplied printed or unprinted in reel fed or pouch/bag format using PE/PE laminates, CPP Films, Cast Micro-Embossed PE films and Blown films

How Biomaster antimicrobial technology works
